

Jumari Blignaut

Full-Stack Software Engineer

jumablignaut@gmail.com 0710465528

Potchefstroom, North-West, South Africa

Summary

Full-Stack Software Engineer with nearly four years of professional experience developing and maintaining web applications across financial technology, higher education and fleet telematics. Experienced in frontend and backend development, with a strong technical foundation in C#, .NET, Angular, TypeScript and SQL. Skilled in building application features, integrating databases and APIs, developing interactive data visualisations, and troubleshooting complex software issues. Comfortable working with established codebases, shared libraries and collaborative development teams. Holds a Bachelor of Engineering in Computer and Electronic Engineering from North-West University, completed with distinction.

Education

Bachelor of Engineering in Computer and Electronic Engineering 2019 – 2022 | Potchefstroom, South-Africa
North-West University
Academic achievement: Graduated with Distinction.

Academic Achievements

The Golden Key Award 2022
Golden Key International Honour Society
Top 15% of the class.

Bachelor of Engineering completed with Distinction 2022
North-West University

Dr Ruth Segomotsi Mompati District Top 10 Learners 2018
Position 8

Grade 12 academic average: 84.5% 2018

Honours student throughout Grades 8–12 2018

Professional Strengths

- **Problem-solving:** Strong analytical thinking and systematic troubleshooting.
- **Teamwork:** Collaborates effectively with colleagues and participates in code reviews.
- **Independent working:** Able to investigate problems, research solutions and manage tasks independently.
- **Initiative and ownership:** Proactively takes responsibility for tasks and follows through on deliverables.
- **Communication:** Clear written and verbal communication.
- **Adaptability:** Willingness to learn new technologies and adapt to changing requirements.
- **Attention to detail:** Careful approach to debugging, code quality and application maintenance.

Professional Experience

Matogen 01/2023 – Present
Software Engineer Potchefstroom, South-Africa
Contributed to the development and maintenance of software solutions across multiple industries, including financial technology, higher education, fleet telematics and workflow automation.

Purple Group — EasyEquities and EasyID Web Applications
Angular, Tailwind CSS, Node.js, C#, .NET Framework, Highcharts, Swagger, Git
- Contributed to the development and maintenance of web applications for EasyEquities and EasyID, working across interconnected projects and shared libraries.
- Developed and maintained frontend and backend functionality using Angular, Node.js, C# and .NET Framework.
- Implemented and enhanced interactive data visualizations using Highcharts, including graph styling and interactive functionality.
- Investigated and resolved software defects, maintained existing features, and contributed to application improvements.

North-West University — WISL
PHP, Angular, SQL, Dropinbase, Docker
- Contributed to the development and maintenance of the WISL web application.
- Worked with frontend, backend and database technologies as part of the development team.

CypherFuel — Fleet Telematics
Angular, NestJS, Node.js, TypeScript, Chart.js, Firebase / Firestore
As part of a development team, worked on a multi-tenant fleet telematics application used to ingest, process and visualize high-volume vehicle data for truck fleets; covering fuel efficiency, trip analysis and driver/vehicle performance scoring.
Frontend
- Built and maintained Angular UI for fleet dashboards, per-vehicle and per-day views, trip-related screens and interactive charts, including styling, responsive layout and usability improvements across the application.

Telematics data & calculations
- Worked with raw telematics and trip data (GPS, CAN bus / vehicle IO, odometer and related counters) and implemented logic to transform that data into operational metrics.
- Developed and refined scoring and calculation models across driving, vehicle, environmental and road factors; including weighting logic, odometer/CAN odometer handling, payload, road classification, altitude/elevation, ambient conditions and related trip metrics; so results could be displayed accurately in the application.

Backend contribution
- Contributed to NestJS services supporting telematics processing, scoring and summary generation used by the frontend.

Jira Workflow Automation — Matogen Zebra
Short-term project | SQL, Jira, Docker
- Independently developed an automated system to manage workshop orders and Jira tickets.

Additional Projects

A Serious Game for Children with Fetal Alcohol Syndrome 01/2022 – 11/2022
North-West University | 2022
- Designed and implemented an Android mobile game using Unity to support children with Fetal Alcohol Syndrome.
- Developed gameplay targeting attention, motor skills and impulse control, including dynamic difficulty adjustment based on player performance.
- Conducted informal testing as part of the project evaluation.

Technologies: Unity, Android development

Additional Information

Portfolio: Available upon request.
References: Available upon request.

Technical Skills

Development Practices
Full-stack software development
Code reviews and code quality assurance
Debugging and troubleshooting
Application maintenance and enhancements
Shared library development and maintenance
Interactive data visualisation

Programming Languages
PHP - Intermediate
HTML5 - Advanced
C# - Intermediate
C++ - Basic
C - Intermediate
TypeScript - Advanced
JavaScript - Intermediate
CSS - Intermediate
SCSS / Sass - Intermediate

Backend Development
.NET Framework - Intermediate
ASP.NET Core - Intermediate
ASP.NET Core Web API - Intermediate
Node.js - Intermediate

Databases & Data Management
SQL - Intermediate
MySQL - Intermediate
MariaDB - Basic
Relational Databases & Database Design - Basic
Database Integration, Data Retrieval & Processing
SQL Server Management Studio - Intermediate

Cloud Deployment & CI/CD
Microsoft Azure
Azure App Service
GitHub Actions
Branch-based deployment workflows
CI/CD build and deployment automation
Environment-specific configuration management

Practical Experience
- Work with GitHub Actions CI/CD pipelines to build .NET API and Angular applications.
- Use branch-based workflows to manage development and UAT deployments, with production deployment still to be configured.
- Automate UAT deployments to Microsoft Azure App Service, including packaging and publishing Angular applications alongside the .NET API.
- Manage environment-specific application configuration and sensitive settings through Azure rather than source control.

Hardware & Embedded Systems
STM32 Nucleo Boards - Basic
Microcontrollers - Basic
MPLAB SNAP Debuggers - Basic
FTDI Devices - Basic
Assembly - Basic

AI-Assisted Software Development
AI Tools: Cursor & Claude Code
AI Methodologies & Practices:
- Specification-Driven Development
- AI-Assisted Software Development Life Cycle (AI-SDLC)
- Context Engineering

Practical Experience:
- Developing and maintaining project-wide AI instructions to enforce consistent coding standards, architectural guidelines and software engineering best practices.
- Using AI for specification-driven code generation, debugging, refactoring and iterative code improvement.
- Reviewing and validating AI-generated code, identifying issues and refining implementations to ensure code quality, maintainability and compliance with project requirements.

Frontend Development & Data Visualisation
Angular — Advanced
Tailwind CSS — Intermediate
Highcharts — Intermediate to Advanced
Chart.js — Intermediate

API Development & Security
REST API Integration - Intermediate
RESTful API Development - Intermediate
API Controllers - Intermediate
JWT Authentication - Intermediate
Swagger / OpenAPI - Intermediate

Development Tools
Git - Advanced
Docker - Intermediate
Jira / Atlassian - Intermediate
Dropinbase - Intermediate
WAMP - Basic
Apache - Basic
XAMPP - Basic

Software & Engineering Tools
MATLAB - Basic
MATLAB Stateflow - Basic
MATLAB Simulink - Basic
Qt Creator - Basic
MPLAB IDE - Basic
STM32 IDE - Basic
Unity - Basic
